

CHOOSE SCIENCE HAVE FUN MAKE A DIFFERENCE

"SCIENCE NEEDS EVERY TYPE OF PERSONALITY, VARIOUS TALENTS, AND WAYS OF THINKING."

Anne-Sophie Poulin-Girard, PhD Student and Lecturer, Université Laval, Center for Optics, Photonics, and Lasers, Canada
Country of origin: Canada

"STEM IS THE BACKGROUND MUSIC OF SCIENTIFIC DISCOVERY."

Ivy Krystal Jones, Physics Doctoral Candidate
Country of origin: USA

"DO WHAT YOU LIKE TO DO.... RESEARCH IS FUN!"

Sylvie Roke, Professor, Ecole Polytechnique Federale de Lausanne (EPFL), Switzerland
Country of origin: The Netherlands

"DIVE IN, FIND WHAT EXCITES YOU, AND RUN WITH IT."

Meredith Lee, Postdoctoral fellow at Stanford in Electrical Engineering, Radiology, and Medicine
Country of origin: USA

PURSUE A CAREER IN OPTICS AND PHOTONICS

Do you envision a better world? Do you want to help save lives, find new energy sources, be part of climate action, or do you just really enjoy science? Are you naturally curious and enjoy finding answers to questions? Consider a career in optics, photonics, and light-based technologies; fields that continue to expand and provide job opportunities all around the world. Optics and photonics professionals such as laser scientists, optical engineers, and astronomers work in cutting-edge sciences that improve and safeguard lives. They make discoveries that protect health, safety, and the security of the world. The fields of optics and photonics need your ideas, inspiration, and passion. You can do it! It's out there waiting for you!
